EDUCATION

Vishwakarma Institute of Information Technology

Bachelor of Technology, CSE (IoT, Cybersecurity & Blockchain) – CGPA: 8.64

Pune, India

2023 – 2027

H.A.K High School

Class XII (Maharashtra State Board) – 82.67%

Manmad, India

2022

EXPERIENCE

AI & Cloud Intern

Edunet Foundation

Sept 2025 – Oct 2025

Remote

- Learned AI fundamentals, API integration, and backend development with Python, and used these skills to build a working project from scratch.
- Built a Streamlit web app using the Cerebras API (Llama 3.3 70B) to generate resumes, cover letters, and portfolio summaries, with PDF export via FPDF.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Web & Backend: HTML, CSS, React, Spring Boot, Flask, REST APIs

Database & Cloud: MySQL, AWS, Docker

Tools & Core CS: Git, GitHub, Postman, OOPs, Computer Networks, Data Structures & Algorithms

PROJECTS

Spendly | Java, Spring Boot, MySQL, React, JWT

- Built a full-stack expense tracker to log income and expenses, with a Java backend and a React frontend, so users can view and manage their spending in one place.
- Added login/signup with secure authentication so each user only sees their own data, keeping every user's expenses private and separate from others.
- Built a dashboard showing income vs. expense trends, and deployed the app live for anyone to use.

DeployFlow | Jenkins, Docker, AWS EC2

- Automated deployment of a containerized two-tier Flask application using Docker and Docker Compose to package the app and MySQL database.
- Built a Jenkins CI/CD pipeline that auto-builds and deploys the app to an AWS EC2 instance on every GitHub push.
- Demonstrated infrastructure automation, continuous integration, and cloud deployment practices.

SocialGuard | Flask, Supabase, JavaScript, Twilio, SendGrid

- Built a social engineering attack simulation platform for organizations to run phishing and smishing campaigns and see how employees respond to them.
- Integrated SendGrid and Twilio APIs to deliver simulated phishing emails and smishing SMS messages to employees.
- Built an analytics dashboard to track simulation results and employee vulnerability metrics, helping teams see where more training is needed.

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations

IBM Full Stack Software Developer

Cisco – Python Essentials 1 & 2

ACHIEVEMENTS

Secured Runner-Up (2nd Place) among 25 teams at Hack for Humanity 2024 for building ZeroPhish, a real-time phishing detection browser extension.
